Education

Clark College, Vancouver, WA

- **Associates in Biology (2019 - 2021)**

Washington State University, Vancouver, WA

- **BS in Biology (2021 – 2024)**
 - **Minor in Molecular Biology**

Experiences

Independent Video Game Developer (2015-2019) | *Developed foundational programming skills in diverse range of programming languages and self-directed learning of software architecture*

Digital Media Entertainment (2019-2021) | *Built science communication and public presentation skills through content creation*

Washington State University - Vancouver, Rudman Lab | Undergraduate Researcher (2022 - May 2024)

- Developed ML-based phenotyping pipeline published as first-author in G3
- Contributed to population genomic analyses across multiple concurrent projects
- Presented research at five regional and national conferences including The Allied Genetics Conference

Washington State University - Vancouver, Rudman Lab | Post Baccalaureate Researcher (May 2024 - Present)

- Led development of bioinformatic pipelines for quantitative genetic and population genomic analyses
- Established and optimized DNA extraction and quality assessment protocols for large-scale genomic studies
- Conduct integrative analyses across whole genome, microbiome, and phenotypic datasets
- Lead bioinformatic analysis for multiple ongoing manuscripts across evolutionary genetics and microbiome research

Skills

- Bilingual fluency: Russian & English
- Proficiency in coding languages; Python, R, Bash. | Familiarity with; C++, C#, HTML, Java.
- Proficiency in utilizing conventional HPC clusters.
- Proficiency in assembling computing hardware & software for local HPC cluster purposes.
- Proficiency in statistical and bioinformatic processes and analyses of whole genome, microbiological and phenotypic data.
- Proficiency in *Drosophila melanogaster* husbandry and large scale phenotyping efforts.
- Proficiency in molecular DNA extraction & DNA QA techniques.

Presentations

- Research Showcase Poster Presentation **WSU-V (2023)**
- Research Showcase Poster Presentation **EVO-WIBO (2023)**
- Research Showcase Poster Presentation **M.J. Murdock (2023)**
- Research Showcase Poster Presentation **WSU-V (2024)**
- Research Showcase Poster Presentation **The Allied Genetics Conference (2024)**

Community Engagement & Outreach

- Community Health & Wellness Mentorship | **Ongoing (2023 - Present)**
 - Provide informal health education, nutritional guidance, and exercise mentorship to community members, friends and family.
 - Drawing from personal health transformation experience to motivate and educate individuals on sustainable lifestyle changes.
 - Regularly facilitate group exercise sessions and provide individualized wellness support.
- WSU-V Peak Your Interest - **Research Oriented Podcast (2023)**
- iTech High School - Research at the Department of Biology **Outreach (2024)**
- HeLa High School - Research at the Department of Biology **Outreach (2024)**
- “Research as an Undergraduate” Seminar at WSU-V **Outreach (2024)**

Awards and Honors

- WSU Vancouver Undergraduate Research Fellows award **(2023)**
- WSU Vancouver Undergraduate Research Showcase Winner **(2023)**
- The Allied Genetics Conference NSF Rising Scientist Grant **(2024)**
- WSU Vancouver Undergraduate Research Showcase Winner **(2024)**
- Academic Excellence Award for Outstanding Research **(2024)**
